

# **Handy Calibrators**

# CA51/CA71

- Source and measure operations can be performed at the same time.
   (Select from the following source signal and measurement signal options: voltage, current, resistance, thermocouple (TC), resistance temperature detector (RTD), frequency, pulse).
- AC voltages, including supply voltage, can be measured.
- Includes a wide array of additional functions.
- Easy operation.
- Compact size and Lightweight

Actual Size

# **CAS1/CA71**

Handy Calibrators

Comprehensive source/measure instruments for all your calibration and equipment checking needs at maintenance sites

Sensors and instruments require a wide variety of operation checks in the field. The CA71 Handy Calibrator is a small, lightweight, multifunction calibrator that can simultaneously source and measure voltage, current, resistance, TC, RTD, frequency, and pulse signals. The CA51 Handy Calibrator is a basic model with the same functions as the CA71 except TC and RTD measurement functions and online communication functions.

# Simultaneous signal source and measurement capability

The CA71 lets you handle regular tests on TCs, RTDs and various other types of sensors and instruments, as well as operation checks when a problem has occurred. By itself it can source signals for input to equipment, and check output signal from equipment. With the CA71, you don't need to worry about synchronizing operations with other setting devices. (TC and RTD measurement functions are CA71 only.)

## A wide array of useful functions

#### Source

Values set in steps of 4-20 mA 24V DC Power Supply to Transmitter

## • Divided output (n/m) function

Output settings are divided, eliminating the need for bothersome calculations for percentage output.

#### Autostep function

Changes the output value in step form based on the setting from the divided output (n/m) function. Changes can be sourced automatically every 10% or 25%.

## Online communication (CA71 only)

RS-232C-compliant optically isolated interface

#### Sweep function

Linearly increases or decrease the output. The increasing/decreasing time can be set to either 16 or 32 seconds.

### Memory function

Source values and measurements forming individual value sets can be saved to or read from the Handy Calibrator's internal memory (maximum 50 value sets).

• Temperature monitor function

# AC voltage (including supply voltage) measurement capability

In cases where numerous signal converters and other devices are mounted on a rack or panel, the Handy Calibrator can be used to check the input and output signals of each device, while simultaneously checking the power supply. There is no need for a separate multimeter to measure supply voltage.

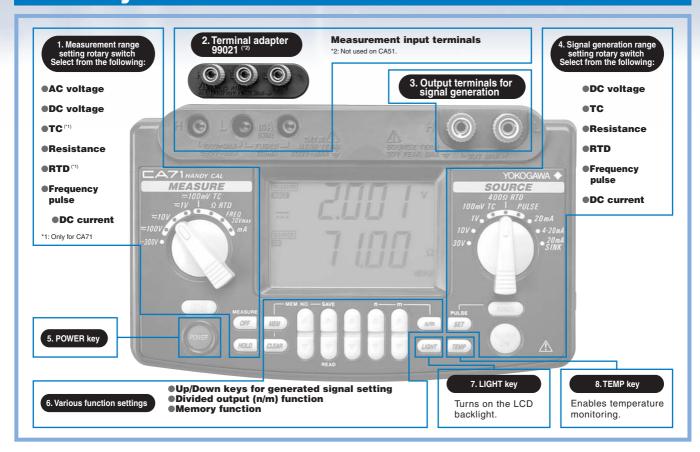

## **Easy operation**

The Handy Calibrator incorporates rotary switches for simple handling. Just open the carrying case cover and connect the cables, and you're ready to take measurements.

# **Panel layout**

# Spare parts

Product	Source signal lead cable	Measurement lead cable	Carrying case	Terminal adapter
		0	Quantum P	
Model	98020	RD031	93016	99021
Remarks	One set, including one red cable and two black cables. Length: approximately 1.7 meters	One set, including one red cable and one black cable. Length: approximately 1.0 meter	The carrying case can hold the source signal and measurement lead cables, terminal adapter, four spare batteries, fuses, AC adapter, and user's manual.	Used in temperature measurement (for CA71).

# Optional accessories (sold separately)

Product		AC adapter		RJ sensor	Accessory carrying case	Communication cable (R\$232)	
		(9401	3)				
Model	94012	94013	94016	B9108WA	B9108XA	91017	
Remarks	For 100 VAC	For 120 VAC	For 220 to 240 VAC	For reference junction compensation	Can hold lead cables, RJ sensor, etc.	D-sub 9-pin (female)	

# Handy Calibrator main unit

Product	CA71 Handy Calibrator	CA51 Handy Calibrator
Model	CA71	CA51
Standard accessories	All of the following are in Source signal lead cables (of Measurement lead cables (of Carrying case: 93016 Terminal adapter for CA71: User's manual: IM CA71-E Four AA alkaline batteries: A	one red, two black): 98020 one red, one black): RD031 99021

  (IPT-witch).

  1: A per JIS C 1604 (TS-90). (1010: U.S C 1604-199). (1010: U.S C 1604-1999). IPTS-68 may be selected through internal settings (IPTS-68 may be switched to IPTS-68 through internal settings (IPTS-69 may include the same range as during frequency source.

General specifications (for both CA51 and CA71)

Parameter	Specification				
Signal generating unit response time	Approximately 1 second (time between start of voltage change and when voltage enters accuracy range)				
Signal generating unit voltage limiter	Approximately 32 V				
Signal generating unit current limiter	Approximately 25 mA				
Divided output (n/m) function	Output = setting $\times$ (n/m) n = 0-m; m = 1-19; n $\leq$ m				
Auto-step output function	n value sent automatically when n/m function selection is selected (two options: approximately 2.5 seconds/step or approximately 5 seconds/step)				
Sweep function	Sweep time (two options: approximately 16 seconds or approximately 32 seconds)				
Memory function	50 value sets (generated and measured values are stored as value sets with the same address (up to 50 value sets can be stored))				
Measuring unit maximum input	Voltage terminal: 300 V AC Current terminal: 120 mA DC				
Current terminal input protection	Fuses: 100 mA/400 V				
Measuring unit ground voltage	Maximum 300 V AC				
Measurement display updating rate	Approximately once per second				
Serial interface	Enabled when communication cable (RS232) is connected; sold separately as optional accessory (CA71 only)				
Display	Segmented LCD (approximately 76 mm × 48 mm)				
Backlight	LED backlight; auto-off after one minute (from when LIGHT key is turned on)				
Power supply	Four AA alkaline batteries, or special AC adapter (8.5 V/150 mA: sold separately)				
Battery life	Measurement off, output 5 V DC/10 k $\Omega$ or greater: Approximately 40 hours Simultaneous signal generation/measurement, output 5 V DC/10 k $\Omega$ or greater: Approximately 20 hours Simultaneous signal generation/measurement, output 20 mA/5 V: Approximately 12 hours (using alkalime bateries; with backlight off)				
Conforming standards	EN61010-1, EN61010-2-030, EN61010-2-033 RD031: EN61010-031 EN61326-1 Class A, EN55011 Class A Group1				
Insulation resistance	Across input terminal and output terminal, 500 V DC, 50 MΩ or greater				

This is a Class A instrument based on Emission standards EN61326-1 and EN55011, and is designed for an industrial

environment.

Operation of this equipment in a residential area may cause radio interference, in which case users will be responsible for any interference which they cause.
