Introduction

Thank you for purchasing the 2793 Decade Resistance Box. This User’s manual contains useful information regarding the instrument’s functions and operating procedures, as well as precautions that should be observed during use. Before using this product, thoroughly read this manual to understand how to use it properly.

Keep this manual in a safe place for quick reference in the event that a question arises.

Contact information of Yokogawa offices worldwide is provided on the following sheet.

Notes

• The information contained in this manual is subject to change without notice. Furthermore, the actual display items may differ slightly from the ones appearing in this manual.
• Every effort has been made to ensure the information contained herein is accurate. However, should any concerns, errors, or emissions come to your attention, or if you have any comments, please contact us.
• Copying or reproduction of any or all of the content of this manual without Yokogawa’s permission is strictly prohibited.
Cautionary Notes for Safe Use of the Product

When operating the instrument, be sure to observe the cautionary notes given below to ensure correct and safe use of the instrument. If you use the instrument in any way other than as instructed in this manual, the instrument’s protective measures may be impaired.

This manual is an essential part of the product; keep it a safe place for future reference. YOKOGAWA is by no means liable for any damage resulting from use of the instrument in contradiction to these cautionary notes.

The following safety symbols are used on the instrument and in the manual:

⚠️ Danger! Handle with Care.
This symbol indicates that the operator must refer to an explanation in the User’s Manual or Service Manual in order to avoid risk of injury or loss of life of personnel or damage to the instrument.

⚠️ WARNING
Indicates a hazard that may result in the loss of life or serious injury of the user unless the described instruction is abided by.

⚠️ CAUTION
Indicates a hazard that may result in an injury to the user and/or physical damage to the product or other equipment unless the described instruction is abided by.
Since mishandling the instrument can result in an accident that may lead to injury or death of the operator, such as an electric shock, be sure to observe the following instructions.

⚠️ WARNING

- **Measurement**
  - Always maintain the instrument within the limits for allowable current, voltage and power, during operation. If there is more than one limit for any of these parameters, the lowest limit takes precedence.
  - Only operate the instrument on an input-to-ground supply voltage of no greater than 250 V (except for Model 279303).
  - When an input-to-ground supply voltage of greater than 250 V needs to be applied to Model 279303, exercise extra care when handling the instrument.
  - The terminals and internal circuitry may become electrified to high voltages and extremely hot depending on the instrument’s condition of use. Do not touch these parts.

- **Grounding**
  - To avoid electric shock, be sure to apply protective grounding to the grounding terminal.

- **Protective Measures**
  - If a crack appears in the instrument after it has been accidentally dropped or bumped, the safety-purpose insulation may be damaged. By all means do not use the instrument, but ask the manufacturer for repair.

- **Operating Environment**
  - Do not operate the instrument in a flammable or explosive gas atmosphere.
  - Do not operate the instrument if there is any condensation on it.

- **Do Not Remove the Casing or Disassemble**
  - Only Yokogawa service personnel are authorized to remove the casing or disassemble or modify the instrument. Do not attempt to repair the instrument yourself, as doing so is extremely dangerous.
  - (If you are rack-mounting the instrument, use it correctly according to the handling procedure.)

1. GENERAL

The 279301 and 279303 Resistance Boxes are high-accuracy variable resistors with 6 dials. Setting of these instruments is easy over wide resistance range.

The 279301 has resistance range of 0.1 to 1111.210 Ω in 1 mΩ steps and accuracy of ±0.01%.
It is best suited for calibration of resistance thermometers.

The 279303 has resistance range of 0 to 111.1110 MΩ in 100 Ω steps and accuracy of ±0.05%.
It is best suited for calibration of insulation resistance testers.

These Decade Resistance Boxes employ in-line display system, and rack-mounting is possible.

Insulation Resistance:
More than 500 MΩ (at 500 VDC) between panel and circuit

Dielectric Strength:
1000 VAC 1 minute between panel and circuit

Dimensions: Approx. 116 × 497 × 140 mm
Weight: Approx. 4.8 kg
Accessory: User’s Manual 1 copy

Disposing the Product

Waste Electrical and Electronic Equipment (WEEE), Directive
(This directive is valid only in the EU.)

This product complies with the WEEE directive marking requirement. 
This marking indicates that you must not discard this electrical/electronic product in 
domestic household waste.

Product Category

With reference to the equipment types in the WEEE directive, 
this product is classified as a “Monitoring and control instruments” product. 
When disposing products in the EU, contact your local Yokogawa Europe B.V. office. 
Do not dispose in domestic household waste.
